**EYEWITNESS PALESTINE**

Building a World Where Palestine is Liberated and All are Free

## *Impact Report: Oct 2024 - Oct 2025*

Over the past year, our programming has expanded in both reach and impact. After nearly two years on pause, we resumed our in-person delegations to Palestine, relaunching with the Black in the Holyland BIPOC Delegation in December 2024. At a time when travel to Palestine is increasingly restricted and solidarity work faces mounting challenges, Eyewitness Palestine remains one of the few organizations still leading delegations on the ground. These delegations are a cornerstone of our work: offering participants the opportunity to witness the realities of occupation firsthand and return home as informed, committed advocates.

Throughout the year, we also expanded our educational offerings, including webinars and virtual delegations, while deepening our mutual aid partnerships in direct support of Palestinian communities.

"The presence of the international delegations in Palestine is a reminder that our pain is seen, our voices are heard, and our cause is not forgotten. Delegates don't just see our reality, they carry a piece of our story in their hearts, and that's very important for us and for our cause. They become our messengers."
